WORKSHEET 13 30.10.25

JavaScript Practice Worksheet — setTimeout() and setInterval()

Part A: Output-Based Questions

Q1. Predict the output after 3 seconds:

```
console.log("Start");
setTimeout(function() {
  console.log("Inside Timeout");
}, 3000);
console.log("End");
```

What will be printed, and in what order?

Q2. What will be displayed after 5 seconds?

```
let count = 0;
let timer = setInterval(function() {
  count++;
  console.log(count);
  if (count === 5) {
    clearInterval(timer);
  }
}, 1000);
```

List all the numbers printed in the console.

Q3. Observe the output order:

```
setTimeout(() => console.log("A"), 2000);
setTimeout(() => console.log("B"), 1000);
console.log("C");
```

Which letters appear and in what order?

Q4. Predict the console output:

```
let x = 1;
setInterval(function() {
```

```
console.log("Value:", x);  
x = x + 2;  
, 2000);
```

Write the first three values printed with their corresponding times.

Q5. Find the error or output:

```
let a = 0;  
setTimeout(() => {  
  a = 10;  
}, 2000);  
console.log(a);
```

What is displayed immediately, and why?

Part B: Coding Practice

Q6. Write a program that shows “Loading...” when opened and after 4 seconds, displays “Welcome to JavaScript Timer Demo”.

Q7. Use `setInterval()` to display numbers from 1 to 10 with a 1-second gap between each. Stop after printing 10.

Q8. Create a digital clock using `setInterval()` that updates every second and shows the current time in hh:mm:ss format.

Q9. Design a background color changer that switches among five colors every second using `setInterval()`. Add a button to stop the color change.

Q10. Make a countdown timer that starts from 10 and displays “Time’s up!” when it reaches 0.

Part C: Conceptual Questions

1. What is the key difference between `setTimeout()` and `setInterval()`?
2. Can you stop a `setTimeout()` before it runs? How?
3. What is the purpose of `clearInterval()`?
4. What is the minimum delay value possible in `setTimeout()`?
5. Why are callback functions commonly used with JavaScript timers?
